EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Claims:

1. (Currently Amended) A seating module for a chair, comprising:
 - a structural framework provided with a an integrally formed, rigidly attachedommel element ~~in a rigid manner~~,
 - a frame arranged above the structural framework and provided with a cantle element , said structural framework and said frame having planar symmetry,
 - means for connecting the frame to the structural framework, including a joint which allows the frame to tilt, in relation to the structural framework, about an axis perpendicular to the plane of symmetry, and
 - a seat connecting the frame to theommel element and formed of an elastic membrane whose function is to define a rest position of the frame in relation to the structural framework and to return the frame to this position when a user tilts the frame in one direction or another.

10. (Currently Amended) A chair fitted with a support in contact with the ground and a the seating module according to claim 1 and fixed to said support, wherein said support includes an arm extending forward and upward and carrying a transverse bar forming a support for the user's knees.

The following is an examiner's statement of reasons for allowance: While the prior art, specifically Greenwald (U.S. Patent No. 6,123,390), teaches a structure similar in structure and function to the present invention but Greenwald is silent or not specific about the structural make-up of the frame of the seat since it only shows the external structure of the seat and its pommel 26 and does not show the internal structure of the framework. Therefore it is not clear if Greenwald teaches a structural framework provided with an integrally formed, rigidly attached pommel element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney B. White whose telephone number is (571) 272-6863. The examiner can normally be reached on Monday-Friday.
